

AKASH NAGAR

ML ENGINEER

Jaipur, Rajasthan, India • [linkedin.com/in/akash-nagar-b06b20244](https://www.linkedin.com/in/akash-nagar-b06b20244) • github.com/techakash32

SUMMARY

ML Engineer with hands-on experience in machine learning, data pipelines, and intelligent application development. Proficient in Python, SQL, Flask, and AWS/Snowflake ecosystems. Passionate about building production-ready ML systems, end-to-end data-driven applications, and exploring cutting-edge AI technologies including large language models and generative AI.

TECHNICAL SKILLS

Languages & Libraries	Python, SQL, C, Scikit-learn, Pandas, NumPy
ML & Data	Machine Learning, Data Pipelines, Data Visualization, Feature Engineering
Frameworks & Platforms	Flask, Snowflake / Snowpipe, AWS (S3, Athena, Lambda)
Tools & Databases	N8N, Zapier, MySQL, Git

PROFESSIONAL EXPERIENCE

Data Science Intern

Regex Software Services, Rajasthan, India • Aug 2025 – Present

- Developed and fine-tuned machine learning models for real-world datasets, improving prediction accuracy.
- Performed end-to-end data preprocessing including cleaning, transformation, and feature engineering.
- Handled MySQL database operations for storing, querying, and managing structured data.
- Collaborated with team members to integrate ML components into application workflows.
- Worked with teams to implement automated workflows and integrations using n8n and Zapier.

PROJECTS

AI Health Analyzer

- Built a web-based AI health analysis system using Flask, delivering productivity and health insights to users.
- Implemented machine learning models with Scikit-learn; used Pandas and NumPy for data preprocessing.
- Integrated MySQL database via MySQL Workbench for persistent user data storage and retrieval.
- Conducted API testing to validate communication between frontend, backend, and ML services.

AWS & Snowflake Data Visualization Pipeline

- Designed and implemented an automated data pipeline using Snowflake and AWS cloud services.
- Configured Snowpipe for continuous, automated data ingestion from AWS S3 into Snowflake tables.
- Wrote advanced SQL queries in Snowflake to generate business insights and perform analytics.
- Produced data visualization outputs to communicate trends and KPIs to stakeholders.

EDUCATION

Bachelor of Computer Applications (BCA)

Modi Institute of Management and Technology, Rajasthan • 2022 – 2025

Relevant coursework: Machine Learning, Data Science, and Cloud Computing.

ADDITIONAL INFORMATION

Certifications: Google Data Analytics: Foundations (Coursera), IBM Data Analysis with Python (IBM SkillsBuild).

Interests: Large language models and generative AI, data-driven web applications, cloud data engineering (Snowflake, AWS), startups, and tech innovation.
